You are an expert in solving Machine Learning **<Bike sharing>**. Your goal is to optimize the solution to the following problem.

Python code:

1. Feature Engineering
2. Data Preprocessing
3. Model Training
4. Evaluation

LLM as Judge

Metric: RMSLE 0.3

Feedback: turn up learning rate.

Info: Error in model.fit

Feedback: Parameter is deprecated, replace it

Take Action

Metric: RMSLE 0.4

Next Step: change author feature engineer.

Metric: RMSLE 0.6

Next Step: fix previous bugs, tune parameters

You are an expert in solving NP **<Hamiltonian circuit>** problem. Your goal is to **maximize** the number of vertices included in the Hamiltonian circuit

Solution:

<think> To solve this problem, we need to... 1. Start from a Random Vertex... 2. Find a Valid Subgraph, From vertex 1, we can move to 2... 3. Expand ...**</think>**
Answer : [x, x, x, x]

Code Validator

Metric: 4

Feedback: valid solution, but not optimal.

Info: Error in Answer

Feedback: node A and B are not connected

Take Action

Metric: 5

Next Step: continue expand this neighbor.

Metric: 4

Next Step: fix previous solution, continue expand
